Technical Skills

- HTML/CSS
- Javascript
- Node.js

Projects

Barhop - HTML CSS & JavaScript/APIs

Our goal was to build an app that would allow a user to enter a city in the search bar and get a list of bars in that city, then allow the user to generate a route using the bars that they have selected. Click here to check out the repository!

Weather Forecast - JavaScript Jquery & APIs

Weather Dashboard is an application that lets users search different cities across the world and view current and future forecasts for that city. This application is in the browser and features dynamically updated HTML CSS,Jquery. Click here to check out the repository!

Quiz Coding Game - HTML CSS & JavaScript

Quiz application using HTML, CSS, and Javascript. This application emphasizes the use of Javascript to provide quiz questions and collect user data to determine whether the answers to a question are correct, this then generates a score and appends a final page of results from the user data.
